Notice to all residents

Water shut-off on Wednesday, December 2

The water supply to buildings A, B and C will be shut off on Wednesday, December 2, from 9:00 am to 3:00 pm, while the plumbers replace the main valve in the basement of building B.

Please fill a few bottles or a kettle the night before. Toilets will flush once from the tank. Do not use the washing machines in the laundry room until 4:00 pm, as the water may run brown for a short time after it comes back.

If you have a medical need for water during these hours, tell the office by Monday, November 30, and we will bring you a 20 litre container.

We are sorry for the trouble. The new valve should stop the leaks that some of you reported in flats B4 and B7 this autumn.
